

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
ADMINISTRATIVE ASSISTANT				
Works with minimal supervision. Provides expertise in general clerical, secretarial, receptionist, word processing, filing and record keeping, and non-complex analysis. Proficient in Microsoft Office and other general-purpose business management software. Performs administrative and management support services for a wide range of office functions. Provides administrative support in the management of personnel, financial, operations and technical programs. Position requires substantial coordination and interfacing with other offices.	Administrative Assistant II	2+	Bachelor's Degree in any field	An associate’s degree with 4 years related experience or 6 years of related experience in lieu of degree.
	Administrative Assistant I	0-2	High School diploma	None
ATC SPECIALIST				
Servers as a senior level air traffic control system specialist to assist the FAA in coordinating activities with air traffic requirements and operations personnel. This support includes: coordinating support for required technical interchange meetings and various program reviews; coordinating workgroup activities for ATO program offices; assisting in air traffic requirements development; system analysis; system/subsystem specifications analysis to ensure air traffic operational concerns are addressed and appropriate technical requirements are included; presenting recommendations/solutions related to short and long-term program planning requirements; developing management plans; assisting in training requirements development; and classifying and summarizing data for the preparation and submission of reports on a recurring basis.	ATC Specialist II	10+	Bachelor's Degree in any field	Associate’s degree with 15 years of Air Traffic Control (ATC) active, full performance level experience, or 20 years of Air Traffic Control (ATC) active, full performance level experience, in lieu of degree, is required. Equivalent experience in the U.S. Military or international control environment is acceptable.
	ATC Specialist I	5+		Associate’s degree with 10 years of Air Traffic Control (ATC) active, full performance level experience, or 15 years of Air Traffic Control (ATC) active, full performance level experience is required, in lieu of degree. Equivalent experience in the U.S. Military or international control environment is acceptable.
COMMUNICATIONS SPECIALIST				
This position works with little supervision and involves support for FAA management up to the executive level to capture concepts, plans, processes, alternatives, schedules, and issues in text, original graphical and video formats for briefings, reports, brochures, web sites, press kits, congressional reports, talking points and other technical documents. Specific skills include, but are not limited to, high-level proficiency with technical writing, editing, graphic design, presentation support, multimedia, and web support.	Communications Specialist II	5+	Bachelor's Degree in any field	Associate’s degree and 10 years of related experience or 15 years of related experience, in lieu of degree, is required.
	Communications Specialist I	0-5		Associate’s degree and 5 years of related experience or 10 years of related experience, in lieu of degree, is required.

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
ENGINEER				
Provides expertise in the design, development, implementation, and analysis of technical products and systems. Has broad knowledge of engineering procedures and provides expertise in the application of state-of-the-art technology to meet mission requirements.	Engineer V	20+	Bachelor of Science Degree in engineering (e.g. civil, electrical, electronic, chemical, industrial, mechanical, aeronautical, avionics, environmental, or computer) or related field	Doctorate in engineering with 10 years of experience, or a Master of Science degree in engineering with 15 years of relevant experience
	Engineer IV	15-20		Doctorate in engineering with 5 years of recent and relevant experience, or a Master of Science degree in engineering with 10 years of relevant experience
	Engineer III	10-15		Master of Science degree in engineering with 5 years of recent and relevant experience
	Engineer II	5-10		Master of Science in engineering with 2 years of experience, or an Associate in Applied Science degree in engineering with 10 years of relevant experience
	Engineer I	0-5		Associate in Applied Science degree in engineering with 5 years of relevant experience
ENGINEERING TECHNICIAN				
Assists electrical, mechanical and systems engineers in the development of the systems infrastructure. Completes tasks related to the design and implementation of hardware and/or software for the systems. Tracks and reports on systems performance.	Engineering Technician III	15+	High School Diploma	None
	Engineering Technician II	10-15		
	Engineering Technician I	0-10		
FINANCIAL ANALYST				
Analyzes business problems, possesses significant knowledge of programs, business, and production management issues; proficient in the use of computer hardware and software application related to cost model creation, preparation and other automated data analysis systems. Demonstrated skills in performing computer driven analysis of the economic, statistical, accounting and financial principles and techniques necessary to support the management of procurements involving major systems acquisitions. Familiarity and responsibility in project budgeting, cost control, forecasting scheduling and reporting.	Financial Analyst III	15+	Bachelor's Degree in Business Administration, Accounting or Finance, Procurement and Contracting, or related field	None
	Financial Analyst II	10-15		
	Financial Analyst I	0-10		

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
HARDWARE DESIGN/TEST ENGINEER				
Provides knowledge and experience in state-of-the-art hardware electronic component, hardware design, development, and system implementation requirements. Able to define interaction and interface among different categories of requirements, and develop appropriate design to support the requirements while employing engineering methodologies. Able to design, develop, and execute system test procedures. Able to serve as a liaison to interpret and translate various disciplines represented on the task team, and serve as a point of contact for evaluation of problems arising from the interdisciplinary nature of the task. Relevant experience includes, but is not limited to, reliability engineering, hardware/system design, and management experience. Duties may include system test and evaluation, and advising technical personnel on a broad range of information systems issues.	Hardware Design/Test Engineer II	10+	Bachelor's Degree in disciplines involving operating systems software, electronics communications analysis and design, digital engineering, RF engineering, test engineering, networking, mechanical engineering, electronic engineering, physics or related field.	None
	Hardware Design/Test Engineer I	0-10		
HUMAN FACTORS ENGINEER				
Performs human factors engineering functions for air traffic control system operators and maintainers. Must be knowledgeable in techniques for performing human factors engineering-related tasks from two or more of the following: task analyses, requirements analysis; human factors engineering studies/analysis, human-system/component interfaces; function/motion of operation, design methodologies, switchology, structured analysis, equipment design/redesign criteria; equipment use and environment, automation principles for allocation of function; modeling techniques, supportability and logistics support, functional analysis, safety engineering, environmental engineering, use of robotics, usability studies, and interactions integrated product teams or multi-discipline design teams. Must have practical experience in providing extensive interaction with system/equipment designers, users, managers, programmers, analysts, logisticians, technicians, educational specialists, and trainers to ensure a complete approach in providing comprehensive engineering solutions.	Human Factors Engineer III	10+	Master's degree in Human Factors Engineering, Cognitive Psychology, or behavioral or related science field or an advanced degree in Industrial or System Engineering with course work in Human Factors Engineering, Cognitive Psychology, or related and a minimum of 10 years total experience of increasing responsibilities and with 7 years specialized experience in human factors.	None
	Human Factors Engineer II	5-10	Bachelor's Degree in Human Factors Engineering, Cognitive Psychology, or behavioral or related science field or a Bachelor's degree in Industrial or System Engineering with course work in Human Factors Engineering, Cognitive Psychology.	None
	Human Factors Engineer I	0-5		
CYBER SECURITY SPECIALIST				
Applies current computer science technologies to the design, development, evaluation, and integration of computer systems and networks to maintain system security and provide information assurance. Provides security engineering and integration support to internal and external customers. Involved in a wide range of security issues including architectures, electronic data traffic, and network access. Uses encryption technology; penetration and vulnerability analysis of various security technologies; and information technology security research.	Cyber Security Specialist III	10+	Bachelor of Science degree in Computer Science, Cyber Security or Information Systems or related field	Two or more information assurance certificates such as Certified Information Systems Security Professional (CISSP) and 10 years of related experience, in lieu of degree .
	Cyber Security Specialist II	5-10	Bachelor of Science degree in Computer Science, Cyber Security or Information Systems or related field	Two or more information assurance certificates such as Certified Information Systems Security Professional (CISSP) and 5 years of related experience, in lieu of degree.
	Cyber Security Specialist I	0-5	Bachelor of Science degree in Computer Science, Cyber Security or Information Systems or related field	Posses an information assurance certificates such as Certified Information Systems Security Professional (CISSP), in lieu of degree.

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
INSTRUCTIONAL SYSTEM DESIGNER				
Guide the design and development training of courses. Must have advanced knowledge of Instructional Design and Courseware Development to lead a group in developing classroom and e-Learning courses. Must be able to demonstrate past experience in courseware design using formal Instructional Systems Design (ISD) methods and processes. Possesses excellent writing skills, communications skills and familiarity with MS-Office and Macromedia Web Technologies, and other training management products. Works with and guide a team consisting of subject matter experts, content providers, graphic designers and end-users are required.	Instructional System Designer III	10+	Bachelors degree in graphic design, communications, English, education, computer science or information systems or related fields.	Associates degree with a minimum of 15 years of related experience
	Instructional System Designer II	5-10		Associates degree with a minimum of 10 years of related experience
	Instructional System Designer I	0-5		Associates degree with a minimum of 5 years of related experience
LOGISTICS ANALYST				
Information system integrated logistics support planning, coordination and conduct of related reviews, and IPP, ILSP and related documentation preparation. Duties includes, but is not limited to, review of final ILS related plans and other documentation, demonstrates ability to ensure compliance with government guidance for logistics support, impact analysis of alternatives, and recommendation with justification of ‘best’ option(s).	Logistics Analyst III	10+	Master of Science degree	Bachelor of Science degree with 10 years of related experience
	Logistics Analyst II	5-10	Bachelor of Science degree	Associate of Applied Science degree with 8 years of related experience
	Logistics Analyst I	0-5	No college degree required	None
METEOROLOGIST				
Provide skilled support in meteorology to support development, evaluation, and analyses of weather data and products, including graphics, text, and binary weather products. Possess a high level of skill in the areas of base data and products from weather sensors, processors, and radars particularly regarding current, state-of-the-art tends in the detection and reporting of meteorological findings.	Meteorologist	5+	Master of Science degree in meteorology, atmospheric science or related field	Bachelor’s degree in meteorology or atmospheric science and 10 years related work experience

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
PROGRAM ANALYST				
Responsible for building, maintaining, and analyzing program data. Duties include generating program/project status, cost and schedule indicators, project schedule trends, critical path analysis, and schedule optimizations. Responsible for developing and analyzing weekly/monthly reports on business related metrics. Identifies potential project trends and risks to management. Supports creation of cost estimates for procurement actions. Develops business systems and processes based on user needs and requirements. Devises or modifies procedures to enable management to make program decisions based on cost benefit analysis and schedule considerations. May have quality assurance responsibilities. Serves as an expert contributor in particular business processes responsible for formulating systems scope and objectives relative to the organization's business plan and industry requirements. Acts independently or as a member of a project team responsible for providing guidance concerning the business implications of the application of various systems. Can create mathematical models and provide quantitative methods related to business processes/ practices. Must be proficient with Microsoft Office products, including Excel, Project, Power Point, and Word.	Program Analyst III	5+	Master of Business Administration degree	Bachelor of Arts/ Science Degree with 10 years related experience or an Associate of Arts/ Science degree and 15 years of related experience
	Program Analyst II	2-5	Bachelor of Arts/Science Degree	Associate’s degree and 10 years of related experience, or 15 years of related experience, in lieu of degree, is required.
	Program Analyst I	0-2	Bachelor of Arts/Science Degree	An associate’s degree and 5 years of related experience, or 10 years of related experience, in lieu of degree, is required.
PROGRAM MANAGER				
Responsible for all Contract Program Management Activities. Responsible for overall assignment of work, management of personnel, financial, operations, facilities and resources, risk management, quality control, contract management reporting, and management of Task Order Leads. Ensures responsiveness and negotiates submitted proposals with the CO/COR. Ensures that projects are fully controlled, that goals and objectives are set, program responsibility is assigned, and results are documented. Must maintain a general knowledge of all technical and management areas of the contract. Must be familiar with the FAA’s Acquisition Management System (AMS). Experienced with contracts of similar size and scope. The PM shall interface with Government management personnel, contractor managers, and customer agency representatives. The PM is responsible for formulating and enforcing work standards, and assigning, scheduling and reviewing work. The PM disseminates policies, purposes, and goals of the organization to subordinates. Director, Leadership team and/or Management team support may be required. Exceptional oral and written communication, organizational, critical thinking and analysis, meeting facilitation, verbal and written communications, and interpersonal interactions skills are essential.	Program Manager	15	Master of Business Administration/ Science degree and Project Management Professional (PMP) certification.	Bachelor's degree and 20 years of related experience. Project Management Professional (PMP) certification desired.
PROJECT MANAGER				
Responsible for supporting all aspects of program/project management involving planning, developing, organizing, coordinating and conducting ATO organizational activities to ensure FAA operational policies, processes and program elements are integrated and documented. This support includes any and all program management related tasks and deliverables. Exceptional oral and written communication, organizational, critical thinking and analysis, meeting facilitation, verbal and written communications, and interpersonal interactions skills are essential.	Project Manager III	5+	Masters degree in engineering/engineering management, systems management or business management field and Project Management Professional (PMP) certification is required.	Bachelors degree and 10 years relevant experience. FAA AMS expertise is desired/a plus. Project Management Professional (PMP) certification.
	Project Manager II	3-5	Bachelor of Arts/Science Degree and Project Management Professional (PMP) certification	Bachelors degree and 7 years relevant experience. FAA AMS expertise is desired/a plus.
	Project Manager I	0-3	Bachelor of Arts/Science Degree	None

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
QUALITY ASSURANCE SPECIALIST				
Develops and implements quality control methodologies to ensure compliance with quality assurance standards, guidelines and procedures in large computer-based organization. Develops and defines major and minor characteristics of quality including quality metrics and scoring parameters and determines requisite quality control resources. Establishes and maintains a process for evaluating hardware, software, and associated documentation and/or assists in the evaluation. Conducts or participates in formal and informal reviews at pre-determined points throughout the development life cycle.	Quality Assurance Specialist	0-2	Bachelor's Degree in Computer Science, Electrical Engineering or Information Systems or related field.	5 years of relevant experience may be substituted for the Bachelor's Degree.
SOFTWARE ENGINEER				
Responsible for design, development, testing and deployment of the computer software. Provides feasibility analysis, problem definition, requirements development, and solution development. Documents and demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments and clear code. Prepares and installs solutions by determining and designing system specifications, standards, and programming. Improves operations by conducting systems analysis, Recommends changes in policies and procedures. Develops software solutions by studying information needs; conferring with users; studying systems flow, data usage, and work processes by following the software development lifecycle.	Software Engineer III	5+	Doctorate in computer science, mathematics, or related specialty	Master of Science degree in computer science, mathematics, or related specialty with 10 years of experience, or a Bachelor of Science degree in computer science, mathematics, or related specialty with 15 years of experience is required.
	Software Engineer II	2+	Master of Science degree in computer science, mathematics, or related specialty	Bachelor of Science degree in computer science, mathematics, or related specialty with 10 years of experience, or an Associate of Applied Science degree in computer science, mathematics, or related specialty with 15 years of experience
	Software Engineer I	0-2	Bachelor of Science degree in computer science, mathematics, or related specialty	Associate of Applied Science degree in computer science, mathematics, or related specialty with 10 years of experience, or 15 years of related experience
STRATEGIC PLANNER				
Provides advisory and analytical support for development of strategies, planning and implementation activities associated with the execution of fundamental changes in how the ATO conducts business. Particular focus will be on building, maintaining, and analyzing schedules and budgets as well as support on planning, developing and implementing strategic plans and schedules; communication planning; develop, coordinate and obtain senior level management input and approval for planning agendas, logistics and communication of planning session; capturing and managing action item status. This activity will include generating program/project status, cost and schedule indicators, project schedule trends, critical path analysis, and schedule optimizations. Responsible for developing and analyzing weekly/monthly reports on business related metrics. Duties may include program and organizational analysis and process mapping to identify barriers to achieving ATO goals and objectives, and advisory and analytical support for ATO-wide communication strategies. Identifies potential project trends and risks to management. Supports creation of cost estimates for procurement actions.	Strategic Planner II	5-10	Bachelor of Arts/Science Degree	15 years of related experience in lieu of degree.
	Strategic Planner I	2-5	Bachelor of Arts/Science Degree	10 years of related experience in lieu of degree.
SUBJECT MATTER EXPERT				
Position involves, but is not limited to, providing technical knowledge and analysis of highly specialized applications and operational environments; and designs and prepares technical reports and presentations in specialized subject matter. Use of this category of labor requires <u>written justification and approval by the Program/Project Team Lead, the Technical Officer and the Contracting Officer.</u> Exceptions to academic requirements can only be approved on a case by case basis by the <u>Contracting Officer.</u>	Subject Matter Expert	15	Doctorate in a specialized discipline	Master's degree with 20 years of progressive and intensive experience in the individual's field of study and specialization
SYSTEMS ENGINEER				

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
Position involves information systems engineering, functional analysis of ATC/M system requirements, development, production, test and evaluation of related information systems. Includes, but not limited to, systems engineering activities oversight, demonstrated expertise with new and legacy systems, technical alternative analyses, acquisition management of information systems, and information management tools.	Systems Engineer III	10+	Master of Science degree in an engineering, mathematics, computer science or related discipline	Bachelor of Science degree in an engineering, mathematics, computer science or related discipline with 15 years of ATC/M systems design and development support experience
	Systems Engineer II	5-10	Bachelor of Science degree	None
	Systems Engineer I	0-5	Bachelor of Science degree	None
TECH OPS SUPPORT SPECIALIST				
Provides operational expertise in the operation and maintenance of National Airspace System (NAS) facilities, systems, subsystems, and equipment. Direct technical and operational ATC experience preferred	Tech Ops Support Spec III	10+	High School Diploma	None
	Tech Ops Support Spec II	5-10		None
	Tech Ops Support Spec I	0-5		None
TECHNICAL WRITER II				
Edits professional documents in conformance with best practices. Determines the suitability of material for target audience. Will be involved in projects from the planning stage, provide additional or missing materials, and edit copy written by persons unskilled in English, edit for content format, flow and integrity. Provides research and writes professional documents, including program reports, and procedures, documentation, including analysis and compilation of diverse policy, technical, statistical, demographic, and financial information.	Technical Writer II	5+	Bachelor’s Degree in English, Communications, Technical Writing or Technology Management or related/ relevant discipline	Associate of Arts Degree in English, Communications, Technical Writing or Technology Management or related/ relevant discipline with a minimum of 10 years of experience, or 15 years of related experience.
	Technical Writer I	0-5		Associate of Arts Degree in English, Communications, Technical Writing or Technology Management or related/ relevant discipline with a minimum of 5 years of related experience, or 10 years of related experience, in lieu of degree.

Program Support Services (PSS) Labor Category and Skill Level Descriptions				
Labor Category	Position Title	Years of Relevant Experience	Degree Requirements (accredited college or university)	Substitutions
TECHNICIAN				
Works independently with close supervision and assists in assessing complex problems and investigates, develops, appraises, selects, and presents solutions. Duties include an interdisciplinary approach using engineering principles. Assists in specifications development, implementation, testing and documenting engineering systems and equipment. Initiates concept development and trade-off studies. Consults extensively with customer representatives and employees. Devises appropriate tests to use in evaluating, debugging, and checking of equipment and systems for accurate and dependable conformance to specifications.	Technician	0-2	Associate in Applied Science degree in engineering or related field.	5 years of experience
